SOURCE: RADIO AD. WLW

COMPANIES: GE

BFI

CLARK

COCA COLA

CONTAMINANTS: RADIOACTIVE MATERIALS

SUMMARY:

The caller very definitely wants to remain anonymous. He does not want the Skinners or the Gregory's to know that he called. I assured him that we would do all we could to protect his anonymity.

The caller was friends with Dexter Gregory, who ran a bulldozer at the site. The caller saw some material at the site from GE that was marked "hazardous", and Dexter said that he had seen things from GE marked "hazardous radiation." He also saw some long cylinders that Dexter said were marked "cobalt." Dexter told Perry that he had covered "tons" of this stuff. Perry saw this early last year, 1990. He said that Dexter worked at the site for two or three years, and now works for Sharonville Foundations in Middletown.

Perry owns the little brown house that is on the lane off the Cin.-Dayton road that the Skinner landfill is on. He said that he had been allowed onto the Skinner property a few times, but that he had a disagreement with the Skinners and that he is not allowed on the property anymore.

Perry said that he had seen trucks from BFI and Clark go into the site, and trucks from Coca-Cola (he thought they were carrying pallettes) and unmarked demolition trucks, tank trucks and dump trucks. He said there were a lot of cars at the site.

Perry was concerned about the site, and wanted information about the contamination and cleanup plans. I gave him the other 800 number, and told him that I would pass his number on to Fred Bartman, RPM for the site.

Perry said that Dexter had been half considering making some sort of report about what he had seen at the site. But Perry wanted to be sure that no one told Dexter that Perry had given his name to the EPA. Perry also said that Dexter's brother Lloyd Gregory knows about the site. Dexter lives in Middletown, and Lloyd lives on a trailer at the Skinner site.

When I asked the caller if he had ever seen Chem-Dyne trucks at the site, he said that he had seen one or two. When I asked him when, he said in '89, '88, or '87.
